Riphah International University, Islamabad
Fall 2023

A Dissertation Submitted To

Faculty of Computing,

Riphah International University, Islamabad

As a Partial Fulfillment of the Requirement for the Award of the

Degree of

Bachelors of Science in Software Engineering

Faculty of Computing
Riphah International University, Islamabad

Date: Dec 08, 2023

Final Approval

This is to certify that we have read the report submitted by Raja Ahmer Abbas (20038) and Najeeb Tahir (21074) for the partial fulfillment of the requirements for the degree of the Bachelors of Science in Software Engineering (BSSE). It is our judgment that this report is of sufficient standard to warrant its acceptance by Riphah International University, Islamabad for the degree of Bachelors of Science in Software Engineering (BSSE).

Committee:

1 _____
Syed Ihtesham Hussain
(Supervisor)

2 _____
Dr. Musharraf Ahmed
(Head of Department/chairman)

Declaration

We want to make it clear that our document, "Business to Door Marketing," is entirely our own work, and we haven't copied it from anywhere. We've put in our personal efforts to complete this project along with the report. Our teachers, especially our supervisor Syed Ihtesham Hussain, guided us throughout the process. We promise that none of the content in our system is taken from any other source or copied from another project. If it's proven otherwise, and any part is found to be a reproduction of someone else's work, we're ready to face the consequences. This declaration reflects our commitment to honesty and accountability in our academic endeavors.

Dedication

Our heartfelt dedication reaches out to the pillars of our journey – our cherished family, steadfast friends, and dedicated teachers. Their unwavering encouragement and invaluable support have been the bedrock of our success in bringing "Business to Door Marketing" to life. A special shout-out goes to our parents for their supreme encouragement, laying the foundation for our endeavors. We extend sincere gratitude to our teachers for their exceptional support, guiding us with wisdom and care on our academic path. In genuine appreciation, we dedicate this work to our esteemed supervisor, “Syed Ihtesham Hussain”. His unwavering commitment, continuous guidance, and transformative mentorship played a pivotal role in turning our ideas into a tangible reality. With deep thanks, we acknowledge the profound impact of these wonderful individuals on our journey. Their collective influence has not only shaped our success but has also added a rich dimension to our academic pursuits, making this endeavor all the more meaningful and fulfilling.

Acknowledgement

Foremost, we express our gratitude to Allah Almighty, the Merciful and the source of all knowledge, for endowing us with the courage and wisdom to bring this project to fruition. In His infinite mercy, we acknowledge the divine guidance that has been instrumental in our journey. Our heartfelt thanks extend to our family, friends, and teachers for their unwavering support, and to our supervisor, Syed Ihtesham Hussain, for his transformative guidance. Together, these influences have shaped our success and made this endeavor a manifestation of shared dedication and divine blessings.

Abstract

B2Door, a groundbreaking web app, revolutionizes marketing solutions for customers seeking efficiency. This platform streamlines the process by integrating map-based analytics, enabling users to pinpoint the ideal marketplace. Offering diverse options, including area-specific maps and customizable templates, clients can choose printing preferences such as A4, B4, Cardstock, Glossy, Matte Finish, and Reflective. The app employs automated filters, facilitating the generation of precise quotations based on distribution preferences like office or house targeting. It incorporates a GPS map enriched with demographic data, empowering users to make informed marketing decisions. B2Door not only oversees flyer distribution in designated areas but also provides live tracking, ensuring a seamless and comprehensive marketing project execution upon customer order.

Chapter 1: Introduction

Introduction

1.1 Overview

B2Door is a web-based application which will be designed and developed for customers who want to save their time for searching the marketers to market their products or services. By using this application customers can choose their right marketplace with the help of analytics that will be available on GPS map. B2Door app will save the time of customers by giving them many kinds of choices like area wise map, printing, distribution and paper type (A4, B4, Cardstock, Glossy and Matte Finish, Reflective etc.). In printing client can use out templates as well as he can give us his own design. We provide an automated quotation based on selected filters like distribution in offices, houses etc. We also provide GPS map with demographic data to our customer and based upon this he can decide suitable area for marketing. In our distribution system we are responsible for distributing the flyers in right areas. We will also provide a live tracking feature in our app. The customer will place order and can contact us for further details. We will be responsible and manage all his marketing project.

1.2 Opportunity & Stakeholders

Our goal is to create a system that facilitates local door-to-door marketing for new businesses, including schools, shops, bakeries, and startups. The system will allow these businesses to select a specific area on a map and gather data on the number of houses, people, specific age groups, offices, pharmacies, public places, etc. in that area where they want to conduct marketing activities. Additionally, they can select the type of paper they would like to use for printing, such as A4, B4, cardstock, glossy, matte finish, reflective, etc. Once these selections have been made, we will provide a quotation based on the selected filters, including distribution in offices, houses, etc., paper type, and single or double-sided printing. If the client has their own brochure design, they can provide it, and we will customize it or create a new one according to their needs. We will also hire a distribution team that will distribute the brochures, and we will have a user management system to check and locate the distributors. Our responsibility is to print out the brochures and distribute them in the selected area. Our system will provide a problem solution to new local businesses, helping them to reach potential customers more effectively.

1.2.1 Stakeholders

1. Local Business
2. Distributors
3. Admin

1.3 Motivation and Challenge

Business to door (B2D) refers to the business model in which a marketer market its products or services directly to the end consumer's doorstep. The B2D model has become increasingly popular in recent years, especially with the rise of e-commerce. Here are some motivations and challenges of B2D.

1.3.1 Motivations of B2D

1. Convenience: B2D provides the ultimate convenience to marketers by offering his marketing services in just a few clicks. There is no need to go outside and searching marketing agencies.
2. Speed: With B2D, marketers can spread their business all over. This speed can be a major competitive advantage for small setups operating at local level.
3. Personalization: By using GPS map analytics then can analysis their potential customers and can know more about their customers.
4. Cost savings: B2D can eliminate the overall cost for marketing by using our quotation system in some clicks without manually doing this. This can also result in lower prices for customers.

1.3.2 Challenges of B2D:

1. Logistics: B2D requires a complex logistics operation (map) to ensure timely and accurate delivery of products to customers.
2. Competition: The B2D model has become increasingly popular, which means that companies must compete with other players in the space. This can result in price wars and decreased profitability.
3. Trust: Marketers may be hesitant to with our web application because they are unfamiliar with, especially if they have never heard of the B2D before. Building trust with customers is essential for success in the B2D space.
4. Regulations: There must be some strict regulations in our project so it can be a bit challenging for us.

1.4 Goals and Objectives

B2D (Business-to-Door) marketing project goals can be to:

1.4.1 Increase awareness

The primary objective of B2D flyer marketing is to increase awareness among marketers about a product or service. The flyer can be used to introduce the product or service and its features to the target audience.

1.4.2 Generate leads

Another objective of B2D flyer marketing is to generate leads for the business. The flyer can include a call-to-action (CTA) that encourages developers to visit the website, sign up for a trial, or contact the sales team.

1.4.3 Build brand recognition

B2D flyer marketing can help build brand recognition among developers which can help create a lasting impression on the target audience.

1.4.4 Increase sales

Ultimately, the objective of B2D flyer marketing is to increase sales. By reaching out marketer's product or service, the business can generate more sales and revenue.

1.5 Solution Overview

Overall, a successful B2Door marketing strategy involves identifying the right target audience, creating a compelling offer, designing effective marketing materials, delivering those materials through the appropriate channels, and continually analyzing, updating map and adjusting the strategy for maximum impact.

1.5.1 Scope of the Project

For Admin

1. Order Management
2. Distribution Management
3. Vehicle Media Management
4. Map Management

Quotation and Invoicing

For Client

1. Client Registration
2. Generate Quotation

1.6 Report Outline

Chapter 1 explains the overall workflow of our system its related goals and objectives and how they will be fulfilled and achieved. This chapter also explains why we are developing this system, what the problem was in the existing marketing system, and how we are giving solution a/c to customer's expectations. The scope of the project is clearly mentioned along with modules and their related features. This chapter covers all functional aspects of our system.

Chapter 2:

Market Survey

2.1 Introduction

Analyzing and studying existing systems in the market is crucial in developing improved systems, as it provides valuable domain knowledge for creating new solutions. To gather data, we conducted a market survey and interacted with individuals who were manually engaged in the business. Through this process, we identified that the existing systems in the market were not fully functional, and marketing was still being done in traditional ways. Marketers had to go through a time-consuming and labor-intensive process of printing flyers from one place and finding distributors from another, resulting in increased costs in terms of time and effort. This market analysis revealed the need for a more efficient system. By gathering data from the market, we obtained the necessary information to build a new system that aims to streamline the marketing process. The findings from our research highlight the potential market opportunity for a more effective and cost-saving solution. With the development of our new system, we aim to address the limitations of the existing systems and provide a more efficient marketing solution for marketers, eliminating the need for multiple steps and reducing the associated costs of traditional marketing methods.

2.2 Literature Review

We conducted a thorough search of various online systems on the internet that were relevant to our system's domain. To compare these systems, we selected different features from each system and conducted a detailed analysis. We identified common features that were present in all systems, as well as unique features that were only present in certain systems. We analyzed following systems:

Table 2.1: Existing System

Features	Direct Marketing	Allied Marketing	Posty (Japan)
Custom area Maps	✗	✗	✓
Statistics	✗	✗	✓
Distribution management	✗	✗	✓
Printing	✓	✓	✓
Quotations	✗	✗	✓
Designing	✗	✗	✗
Vehicle Media buying	✗	✗	✗

2.3 Summary

Based on our survey of different systems and meetings with small business owners, schools, and bakeries, we have concluded that there are existing systems in place. However, there are several features and functionalities that need to be added or improved, particularly in vehicle media buying and distribution. This finding gives us more confidence that we can introduce new and innovative elements to our system, making it unique and different and better meeting the sufficient needs of our customers. With this feedback and input from various stakeholders, we are determined to regenerate our system by incorporating improvements and enhancements that will make it more effective and efficient in addressing the needs of our target market. We are excited about the opportunity to bring a fresh perspective and develop a system that will truly stand out in the industry.

Chapter 3: Requirement Engineering

3.1 Introduction:

In this chapter we will discuss all functional and nonfunctional requirements of Business to Door. And we will discuss the needs and problem statement due to which we are developing this system.

3.2 Problem Scenarios

Table 3.1: Problem statement 1

The Problem of	Don't know the exact area-wise Statics to do marketing
Affects	Small Businesses, Distributors
The Result of Which	Financial Loss
Benefits of	Based on Exact Area can cause low cost on marketing

Table 3.2: Problem statement 2

The Problem of	Needs to find and go outside in marketing agencies.
Affects	Small Businesses
The Result of Which	Financial and Time Loss
Benefits of	They can do marketing while staying inside.

Table 3.3: Problem statement 3

The Problem of	Don't know the expense
Affects	Small Businesses
The Result of Which	Complications in making decision
Benefits of	Provide quotation according to their selection. Helps in making decision according to their budget.

3.3 Functional Requirements

3.3.1 For Admin

1. Admin should be able to login to the system.

3.3.2 Order Management

1. Admin should be able to check orders.

2. Admin should be able to check payments.
3. Admin should be able to further proceed for printing hard Copies.
4. Admin should be able to check orders history.
5. Admin should be able to check how many projects our system received. 7) Admin should be able to check how many projects are pending list.
6. Admin should be able to check how many projects are completed.
7. Admin should be able to check the revenue.
8. Admin should be able to check distribution type (Housing, Commercial area, All).

3.3.3 Distribution Management

1. Admin should be able to register a distributor
2. Admin should be able to set pricing with a distributor.
3. Admin should be able to check that how many distributors are registered in our system.
4. Admin should be able to check distributors.
5. Admin should be able to check how many distributors are doing their assigned tasks right now.
6. Distributor should be able to mark “confirmed” before starting his/her task. Admin should be able to depart the distributor to the selected area.
7. Admin should be able to track the distributor.
8. Distributor should be able to mark “completed” after completing his/her task.
9. Admin should be able to cancel the order of the distributor.
10. Admin should be able to pay distributors after completing their task.
11. Admin should be able to check the history of distributor.

3.3.4 Printing Management

1. Printing Press should be able to check how many copies to be printed.
2. Printing Press should be able to check the paper type.
3. Printing Press should be able to check the paper size.
4. Printing Press should be able to check the design of flyer/brochure.

3.3.5 Vehicle Media Buying

1. Admin should be able to register a vehicle.
2. Admin should be able to check the total number of registered vehicles.
3. Admin should be able to check how many vehicles are wrapped.
4. Admin should be able to check how many vehicles are available.
5. Admin should be able to check the route of vehicle.

6. Admin should be able to set the price with the owner manually.
7. Admin should be able to check the time of advertisement.
8. Vehicle owner should be able to check the time of advertisement.
9. Admin should be able to pay vehicle owners.
10. Admin should be able to cancel the order of the vehicle.

3.3.6 Map management

1. Admin should be able to provide the map.

3.3.7 Quotation

1. Client should be able to check the quotation.
2. Admin should be able to set pricing.

3.3.8 For Client

1. The client should be able to register to the system.
2. The client should be able to place order.
3. The client should be able to generate quotation according to criteria.
4. The client should be able to track distributor
5. The client should be able to upload his files.
6. The client should be able to select Map (area).
7. The client should be able to pay charges.
8. The client should be able to chat with admin.

3.4 Nonfunctional requirements

There are no specific NFR in our system.

3.5 SQA activities

Defect Detection:

We applied black box testing technique for defect detection and designed our test cases.

3.5.1 Test Case Design:

Functional Requirement Test Cases

3.5.1.1 User Registration

Table 3.4: User Registration

Input	Valid Class	Invalid Class
Username	{aA,bB,.....,zZ} {0,1,2,.....,9}	Outside valid class
Email	{aA,bB,.....,zZ} {0,1,2,.....,9} {@}	Outside valid class
Password	Length>=8 {aA,bB,.....,zZ} {0,1,2,.....,9} {!,@,#,...}	Outside valid class
Confirm Password	Length>=8 {aA,bB,.....,zZ} {0,1,2,.....,9} {!,@,#,...}	Outside valid class

Table 3.5: User Registration Valid

Test case id: 01	username	email	Password
Input	NajeebTahir	tahir@gmail.com	Tahir@125
Partition Tested	{aA,bB,.....,zZ} {0,1,2,.....,9}	{aA,bB,.....,zZ} {0,1,2,.....,9} {@}	Length>=8 {aA,bB,.....,zZ} {0,1,2,.....,9} {!,@,#,...}
Expected Output	Valid input	Valid input	Valid input

Table 3.6: User Registration In-Valid

Test case id: 02	username	email	Password

Input	5thousand rupees
Partition Tested	{aA,bB,.....,zZ} {0,1,2,.....,9}
Expected Output	Enter valid input

3.5.1.5 Printing Copies

Table 3.19: Valid Printing Copies

Test case id: 14	Print copies
Input	Take design from the client and print 500 copies
Partition Tested	{aA,bB,...,zZ} {0,1,2,...,9}
Expected Output	Copies printed.

Table 3.20: In-Valid Printing Copies

Test case id: 15	Print copies
Input	12345
Partition Tested	{aA,bB,...,zZ} {0,1,2,...,9}
Expected Output	Enter valid statement

Table 3.21: In-Valid Printing Copies

Test case id: 16	Print copies
Input	Num1000
Partition Tested	{aA,bB,...,zZ} {0,1,2,...,9}
Expected Output	Enter valid statement

3.5.1.6 Distribution Type

Table 3.22: Valid Distribution Type

Test case id: 17	Distribution type
Input	This distribution type is residential and the order is for sector G-10 and G-11 Islamabad
Partition Tested	{Aa,...,Zz} {0,1,2,3,...} {!,@,#,...}
Expected Output	Valid statement

Table 3.23: In-Valid Distribution Type

Test case id: 18	Distribution type
Input	@/G-10
Partition Tested	{Aa,...,Zz} {0,1,2,3,...} {!,@,#,...}
Expected Output	Enter valid statement

Table 3.23: In-Valid Distribution Type

Test case id: 19	Distribution type
Input	#/G-eleven
Partition Tested	{Aa,.....,Zz} {0,1,2,3,... } {!,@,#,...}
Expected Output	Enter valid statement

3.5.1.7 Distributor Tab

Table 3.24: Valid Distribution Tab

Test case id: 1	Registered Distributors
Input	The total number of distributors in our system are 150
Partition Tested	{aA,bB,.....,zZ} {0,1,2,.....,9} {!,@,#,\$,...}
Expected Output	Valid statement

Table 3.25: In-Valid Distribution Tab

Test case id: 2	Registered Distributors
Input	Num=155
Partition Tested	{aA,bB,.....,zZ} {0,1,2,.....,9} {!,@,#,...}
Expected Output	Enter valid statement

Table 3.26: In-Valid Distribution Tab

Test case id: 3	Registered Distributors
Input	Distributor#191
Partition Tested	{aA,bB,.....,zZ} {0,1,2,.....,9} {!,@,#,...}
Expected Output	Enter valid statement

3.5.1.8 Paying Distributor

Table 3.27: Valid Paying Distributor

Test case id: 10	Pay distributor
Input	@AsifAli you have completed your task and your payment has been successfully transferred Rs:25,000 to your Account No : 55429785789
Partition Tested	{Aa,... ..,Zz} {0,1,2,3,... } {@,\$,%,& .. }
Expected Output	Valid statement

Table 3.28: In-Valid Paying Distributor

Test case id: 11	Pay distributor
Input	#20000 Rs transferred to account 55429785789
Partition Tested	{Aa,...,Zz} {0,1,2,3,... } { @,\$,%,&... }
Expected Output	Invalid Statement

3.5.1.9 Distribution Cost

Table 3.29: Valid Distribution Cost

Test case id: 12	Distribution Cost
Input	The total distribution cost of Bilal's marketing project in sector G-9 and G-10 Islamabad is Rs :30,000
Partition Tested	{Aa,...,Zz} {0,1,2,3,...} { @,\$,%,&... }
Expected Output	Valid statement

Table 3.30: In-Valid Distribution Cost

Test case id: 13	Distribution Cost
Input	Total cost=30,000Rs
Partition Tested	{Aa,...,Zz} {0,1,2,3,...} { @,\$,%,&... }
Expected Output	Invalid Statement

Table 3.31: In-Valid Distribution Cost

Test case id: 14	Distribution Cost
Input	G-9, G-10 project cost is 30000
Partition Tested	{Aa,...,Zz} {0,1,2,3,...} { @,\$,%,&... }
Expected Output	Invalid Statement

3.5.1.10 Paper Type

Table 3.32: Valid Paper Type

Test case id: 15	Paper type
Input	The paper type for this project is Glossy and its size is A4.
Partition Tested	{Aa,...,Zz} {0,1,2,3,...}
Expected Output	Valid statement

Table 3.33: In-Valid Paper Type

Test case id: 16	Paper type
Input	#reflexive/ size is b4
Partition Tested	{Aa,...,Zz} {0,1,2,3,...}
Expected Output	Invalid Statement

Table 3.34: In-Valid Paper Type

Test case id: 17	Paper type
Input	Matt with A4
Partition Tested	{Aa,...,Zz} {0,1,2,3,...}
Expected Output	Invalid Statement

3.5.1.11 Vehicle Media

Table 3.35: Valid Vehicle Media

Test case id: 1	Vehicles number
Input	In system, the total number of registered vehicles is 117 since January, 01, 2022 until now
Partition Tested	{Aa,...,Zz} {0,1,2,3,...}
Expected Output	Valid statement

Table 3.36: In-Valid Vehicle Media

Test case id: 2	Vehicles number
Input	#68 vehicle are register
Partition Tested	{Aa,...,Zz} {0,1,2,3,...}
Expected Output	Enter valid statement

Table 3.37: In-Valid Vehicle Media

Test case id: 3	Vehicles number
Input	89/ since january 2022
Partition Tested	{Aa,...,Zz} {0,1,2,3,...}
Expected Output	Enter valid statement

3.5.1.12 View Vehicle Route

Table 3.38: Valid Vehicle Media Route

Test case id: 4	Vehicles route
Input	The Vehicle (Van) with registration number BRB 430 route is from Rawat to Taxila.
Partition Tested	{Aa,...,Zz} {0,1,2,3,...}
Expected Output	Valid statement

Table 3.39: In-Valid Vehicle Media Route

Test case id: 5	Vehicles route
Input	#rawat to #taxila
Partition Tested	{Aa,...,Zz} {0,1,2,3,...}
Expected Output	Invalid Statement

Table 3.40: In-Valid Vehicle Media Route

Test case id:6	Vehicles route
Input	*Taxila to /peshawar
Partition Tested	{Aa,...,Zz} {0,1,2,3,...}
Expected Output	Invalid Statement

3.5.1.13 Advertising Cost w.r.t Time

Table 3.41: Valid Ad Cost

Test case id: 7	Advertising Cost
Input	The vehicle [BRB 449] is hired for 2 weeks and its advertising cost is Rs. 6,000 .
Partition Tested	{Aa,...,Zz} {0,1,2,3,...} {@,\$,%,&...}
Expected Output	Valid statement

Table 3.42: In-Valid Ad Cost

Test case id: 8	Advertising Cost
Input	(BRJ 668) hired for week
Partition Tested	{Aa,...,Zz} {0,1,2,3,...} {@,\$,%,&...}
Expected Output	Invalid Statement

Table 3.43: In-Valid Ad Cost

Test case id: 9	Advertising Cost
Input	Advertising cost for this vehicle is #7000 Rs
Partition Tested	{Aa,...,Zz} {0,1,2,3,...} { @,\$,%,&...}
Expected Output	Invalid Statement

3.5.1.14 Map

Table 3.44: Valid Map

Test case id: 1	Map providing
Input	Sector G-11 which has 200 Houses, 5 Parks, 10 Mosques, 4 supermarkets, and 7 schools.
Partition Tested	{Aa,...,Zz} {0,1,2,3,...} { @,\$,%,&...}
Expected Output	Valid statement

Table 3.45: In-Valid Map

Test case id: 2	Map providing
Input	G-9 has #180 homes and offices
Partition Tested	{Aa,...,Zz} {0,1,2,3,...} { @,\$,%,&...}
Expected Output	Invalid Statement

Table 3.46: In-Valid Map

Test case id: 3	Map providing
Input	@G-10 has 156 houses and schools
Partition Tested	{Aa,...,Zz} {0,1,2,3,...} { @,\$,%,&...}
Expected Output	Invalid Statement

3.5.1.15 Quotation

Table 3.47: Valid Quotation

Test case id: 1	Map providing
Input	The MOQ is 1,000 flyers for sector G-10 with the total marketing price of Rs.25,000.
Partition Tested	{Aa,...,Zz} {0,1,2,3,...} { @,\$,%,&... }
Expected Output	Valid statement

Table 3.48: In-Valid Quotation

Test case id: 2	Map providing
Input	The price for sector @ G-9 is 20000
Partition Tested	{Aa,...,Zz} {0,1,2,3,...} { @,\$,%,&... }
Expected Output	Invalid Statement

Table 3.49: In-Valid Quotation

Test case id: 3	Map providing
Input	25000 is the price for sector #G-10
Partition Tested	{Aa,...,Zz} {0,1,2,3,...} { @,\$,%,&... }
Expected Output	Invalid Statement

3.5.1.16 Client

Table 3.50: Valid Client Login Credentials

Test case id: 1	Name
Input	Najeeb Tahir
Partition Tested	{aA,bB,cC,...,xX,yY,zZ}
Expected Output	no error

Table 3.51: In-Valid Client Login Credentials

Test case id: 2	Name
Input	M.r_Najeeb
Partition Tested	{aA,bB,cC, ...,xX,yY,zZ }
Expected Output	Please enter only alphabets

Table 3.52: In-Valid Client Login Credentials

Test case id: 3	Name
Input	tahir@125
Partition Tested	{aA,bB,cC, ...,xX,yY,z Z}
Expected Output	Please enter only alphabets

3.5.1.17 Generate Quotation

Table 3.53: Valid Generate Quotation

Test case id: 4	Generate Quotation
Input	Map's Selected area : G-10 Number of copies : 1000 Time duration : 1 week Total Advertising Cost :Rs 25,000.
Partition Tested	{Aa,...,Zz} {0,1,2,3,...} { @,\$,%,&...}
Expected Output	Valid statement

Table 3.54: In-Valid Generate Quotation

Test case id: 5	Generate Quotation
Input	@ G-9 advertising for 2 week
Partition Tested	{Aa,...,Zz} {0,1,2,3,...} { @,\$,%,&...}
Expected Output	Invalid Statement

Table 3.55: In-Valid Generate Quotation

Test case id: 6	Generate Quotation
Input	1500 flyers for sector #G-9
Partition Tested	{Aa,...,Zz} {0,1,2,3,...} { @,\$,%,&...}
Expected Output	Invalid Statement

Chapter 4:

System Design

4.1 Introduction

Design is a significant engineering representation of something that is intended to be constructed. It is derived from the customer's requirements. Without proper design, there is a risk of developing an unstable system that may fail when even minor changes are made. It could also be challenging to test such a system, and its quality may only be assessed late in the software development process, when time is limited, and a considerable amount of money has already been invested. In this chapter, we will explore the importance of design, the paradigm employed in this project, and the architecture chosen for the development of our marketing project.

4.2 Architectural Design

Figure 4.1: Architecture Diagram

4.3 Class Diagram

Figure 4.2: Class Diagram

4.4 Activity Diagrams:

4.4.1 Client

Figure 4.3: Client Activity Diagram

4.4.2 Admin

Figure 4.4: Admin Activity Diagram

4.5 Use Case Diagram

4.5.1 Admin:

Figure 4.5: Admin Use Case Diagram

4.5.2 Client:

Figure 4.6: Client Use Case Diagram

4.6 Fully Address Use Cases

4.1.1 Admin

Table 4.1: Check Order

UC-ID # 1	
Use Case Name: Check Order	
Primary Actor: Admin	
Pre-Condition: 1. Admin must be login to the system.	
Post-Condition: 1. Admin will be able to view Customers Order.	
Main Scenario	1. Admin initiate this use case by clicking “Orders” module 2. System displays the orders management dropdown list 3. New Orders 4. Completed Orders 5. Admin can check detail any of these by simply clicking anyone
Alternate	Redirect to back with error message.

Table 4.2: Check Payment

UC-ID # 2	
Use Case Name: Check Payment	
Primary Actor: Admin	
Pre-Condition: 1. Admin must be logged in to the system.	
Post-Condition: 1. Admin will be able to check payment.	
Main Scenario	1. Admin initiate this use case by clicking “Orders” module 2. System displays the orders management dropdown list 3. Admin clicks on orders. 4. The system displays the payment status in the table.
Alternate	Redirect to back with error message.

Table 4.3: Check History

UC-ID # 3	
Use Case Name: Check History	
Primary Actor: Admin	
Pre-Condition: 1. Admin must be logged in to the system.	
Post-Condition: 1. Admin will be able to check the history of orders.	
Main Scenario	1. Admin initiate this use case by clicking “Orders” module 2. System displays the orders management dropdown list 3. Admin click on orders tab. 4. Admin can search for any order.
Alternate	Redirect to back with error message.

Table 4.4: Register Distributor

UC-ID # 4	
Use Case Name: Register Distributer	
Primary Actor: Admin	
Pre-Condition: 1. Admin must be logged in to the system.	
Post-Condition: 1. Admin will be able to register a distributor.	
Main Scenario	1. Admin initiates this use case by visiting user management module from admin dashboard. 2. Admin clicks on the add new button. 3. A system displays a registration form dashboard. 4. Admin clicks on the add new button. 5. A system displays a registration form 6. Admin can register by entering all the related data. 7. Admin submits the form 8. System displays data in the tabular form
Alternate	Redirect to back with error message.

Table 4.5: Track Distributor

UC-ID # 5	
Use Case Name: Track Distributor	
Primary Actor: Admin	
Pre-Condition: 1. Admin must be logged in to the system.	
Post-Condition: 1. Admin will be able to track a distributor.	
Main Scenario	1. Admin initiates this use case by visiting distribution module from admin dashboard. 2. Admin clicks on tracking. 3. System shows a Google Sheet. 4. Admin can add the start and end time of distributor's task
Alternate	Redirect to back with error message.

Table 4.6: Pay Distributor

UC-ID # 6	
Use Case Name: Pay Distributor	
Primary Actor: Admin	
Pre-Condition: 1. Admin must be logged in to the system.	
Post-Condition: 1. Admin should be able to pay distributor.	
Main Scenario	1. Admin initiates this use case by visiting distribution module from admin dashboard. 2. Admin clicks on order. 3. System will display options. 4. Select any one option.
Alternate	Redirect to back with error message.

Table 4.7: Print Design

UC-ID # 7	
Use Case Name: Printing Design.	
Primary Actor: Admin	
Pre-Condition: 2. Printing Press User must be logged in to the system.	
Post-Condition: 2. Printer Press User will be able to print the design/copies.	
Main Scenario	5. Press User initiates this use case by visiting printing module from the dashboard. 6. System shows a dropdown list of status: • New • Confirm • Complete 7. Press User mark confirm to before printing. 8. System will display all orders 9. Admin clicks on completed 10. The system will show all completed orders.
Alternate	Redirect to back with error message.

Table 4.8: Check Order History

UC-ID # 8	
Use Case Name: Check Order History	
Primary Actor: Admin	
Pre-Condition: 1. Admin must be logged in to the system.	
Post-Condition: 1. Admin will be able to view Quotation details.	
Main Scenario	1. Admin clicks on order module from dashboard 2. System will show different status of orders. 3. Admin clicks on new orders 4. System will show analytics to admin
Alternate	Redirect to back with error message.

4.1.2 Client

Table 4.9: Select Map

UC-ID # 1	
Use Case Name: Select Map	
Primary Actor: Client	
Pre-Condition: 1. Client must be logged in to the system.	
Post-Condition: 1. Client will be able to select specific area on map.	
Main Scenario	1. Client initiates this use case by visiting orders module and add new order page. 2. System shows a map on right side of screen 3. Client can select his desired areas from map.
Alternate	Redirect to back with error message.

Table 4.10: Select Design

UC-ID # 2	
Use Case Name: Select Design	
Primary Actor: Client	
Pre-Condition: 1. Client must be logged in to the system.	
Post-Condition: 1. Client will be able to select designs file.	
Main Scenario	1. Client initiates this use case by clicking on client dashboard in order module. 2. System shows add new Order button. 3. Client clicks and a Add new order to Place New Order. 4. User can select design in the design tab 5. User will fill all the required fields and submit the form.
Alternate	Redirect to back with error message.

Table 4.11: Generate Quotation

UC-ID # 3	
Use Case Name: Generate Quotation	
Primary Actor: Client	
Pre-Condition: 1. Client must be login to the system. 2. Client must be fulfilling the data input fields	
Post-Condition: 1. Client can generate the quotation	
Main Scenario	1. Client initiates this use case by visiting client-side dashboard. 2. System shows My Order tab 3. Client clicks and a dropdown Place New Order. 4. System shows the input fields 5. Select media type 6. Paper size 7. Distribution Type 8. Select map 9. Upload File Attachments 10. Number of copies 11. Client fills all these input fields and press Print Quotation 12. System prints a quotation to client.
Alternate	Redirect to back with error message.

Table 4.12: Place Order

UC-ID # 5	
Use Case Name: Place Order	
Primary Actor: Client	
Pre-Condition: 1. Client must be login to the system. 2. Client must have placed an order.	
Post-Condition: 1. Client will give his order to B2Door Marketing.	
Main Scenario	1. Client initiates this use case by visiting client-side dashboard. 2. System shows My Order tab 3. Client clicks and a dropdown Place New Order. 4. System shows the input fields 5. Client fills all these input fields and press place order. 6. System shows success message to client.
Alternate	Redirect to back with error message.

Chapter 5: Implementation

5.1 IDE, Tools and Technologies

5.1.1 Front-End:

1. HTML
2. CSS
3. Bootstrap
4. JavaScript
5. jQuery
6. FilePond
7. FlatPickr
8. Toastr

5.1.2 Back-End:

1. Laravel
2. Yajra Data Table

5.1.3 Database:

1. PostgreSQL

5.1.4 Tools:

1. VS Code
2. EdrawMax
3. Star UML
4. Git & GitHub
5. Figma

5.2 Best Practices / Coding Standard

1. Naming Conventions
2. Coding Standards
3. Error Handling
4. Optimization

Chapter 7: Conclusion & Outlook

7.1 Introduction

We looked at every part of this project carefully, from the beginning to the happy ending. We checked what we did well, the improvements we made, and thought about how the project might grow in the future. The summary we're sharing here doesn't just highlight our successes, but also talks about the problems we fixed from past solutions. Along the way, we faced many tough situations and challenges. But, our strong passion and deep happiness for successfully finishing the project are clearly explained in this chapter.

5.2 Achievements and Improvements

The successful implementation of the “B2Door” project is a testament to our unwavering dedication and collaborative efforts. Throughout the journey, we encountered numerous challenges during the requirement gathering phase, development, and integration. However, our team demonstrated resilience and perseverance, ultimately overcoming these obstacles.

Despite facing fluctuations within the team, we remained focused on our goals and continually strived to work more efficiently within the allocated timeframe. In our quest for excellence, we extensively studied existing systems with similar features, allowing us to identify gaps and areas for improvement. Throughout the project, our dedicated project supervisor played a pivotal role, providing guidance and support from day one till the present. Their expertise and guidance proved instrumental in helping us accomplish our tasks and meet the project's objectives.

In conclusion, the B2Door project represents a remarkable achievement, driven by our collective determination, extensive learning, and implementation. We are proud of the results we have achieved and the impact our solution will have on addressing the needs of our target audience.

7.3 Critical Review

Our Project targets every level of business who want to expand it quickly. Our project will minimize their efforts which they put like they go manually outside and consume their time and resources. The system will help them and reduce their efforts. They can market their product or service in just few clicks.

7.4 Future Recommendations/Outlook

Looking forward, there are a few important suggestions for the future of the marketing Project. First, it's a good idea to keep learning about what customers like and what's new in the market. This can help make better plans for selling things and staying ahead of others. Second, it's important to use the internet and social media to tell more people about the products. Things like social media, making interesting content, and making sure the website shows up on search engines are important. Also, it's a good idea to make customers feel special by using their names and remembering what they like. This can make them want to keep buying things. Project's reach and credibility. By staying

adaptable and responsive to market changes, the marketing project can position itself for continued success in the dynamic business landscape.

7.5 Summary

The system operates seamlessly and demonstrates efficient performance in executing the tasks assigned by both the Admin and clients. It serves as a comprehensive platform that not only facilitates their connection but also fosters a bond of trust and confidence. At this juncture, the project is fully prepared to be utilized as a market-ready product or can be further developed into a thriving business startup.
